

From the City of Lawton

*DEPARTMENT OF PARKS & RECREATION
7 January 2020*

Recent testing conducted by the Oklahoma Natural Environmental Specialists at the HC King Center confirmed the presence of mold in the kitchen area, a space leased and maintained by the Delta Nutrition Project.

Operations in this area were suspended following the discovery of an unknown substance in early December. Testing results were communicated to Delta Nutrition last week. A copy of the report, as relayed to the City of Lawton from the responsible party, may be found on lawtonok.gov.

City officials are working alongside Delta Nutrition to ensure recommended corrective action, as outlined in the report, is taken swiftly. The kitchen area of the facility will be locked and closed off to all until proper treatment is carried out. Other center operations are ongoing.

For more information, call Parks and Recreation Administration at 580.581.3400.
